A Word from the Editor

Will Stanley, Editor, The *REACTer*

Greetings and Happy 4th of July!

You know, there's an old joke about whether England has a Fourth of July and of course, the answer is YES.

They also have a 5th and 6th and so on!

It is July and most areas are ramping up for many activities... parades, civic events, storm spotting and more. There has never been a better time for you to get out there in your community and let the people see you in action. Wear your uniforms and spread the word that *REACT* is here!

Whatever kinds of things you do, find a reporter at your local paper, radio or TV station and get friendly with them. Tell them what you are doing. Believe me, those folks are always on the prowl for good stories. Make your *REACT* Team one of them!

Check out the Publicizing *REACT* column this month for another idea on getting some publicity.

All in all, it's a good time to be a *REACTer*!

The *REACTer* (ISSN 1055-9167) is the official publication of *REACT International, Inc.*, a non-profit public service corporation.

SUBMITTING **TEAM NEWS**

Is EASY!

Just follow this guideline...

NAME of Person Reporting— TEAM NUMBER— TEAM LOCATION

DESCRIPTION of ACTIVITIES (Who, What, Where, When, Why, and How)

Provide this info for each event in your report

INCLUDE PICTURES—attach them to your email—don't send .PDFs

(Caption: WHO, WHAT and WHERE each picture shows)

NAME of Photographer

SEND the entire report (with pictures attached) to:

EDITOR@THEREACTER.COM

SEE HOW EASY THAT WAS?

So Easy, even a caveman could do it! (sorry, Geico, I couldn't resist)

to get on the net**

Publicizing **REACT**

Publicizing *REACT* is fairly easy. Tell people what you are doing. Get to know a reporter at your local newspaper or TV or Radio station. Believe me, those folks are **ALWAYS** looking for material!

Let me tell you another way to get publicity for your Team... use a STAR.

Yeah, a star, an actor/actress, a celebrity, whatever you want to call them. There are a lot of them that are out in the cities and towns of this country doing various and sundry promotional work. All you have to do is find them and then approach them.

Yeah... approach them. How do you do that? It's fairly easy. Walk right up to them, introduce yourself and ask them if they know about *REACT*. You'd be surprised how many actually do!

Once, many years ago, I had an opportunity to meet with LeRoy Van Dyke, country music star (you old guys will remember him). He was going to be at the local Home Show where I lived. I went out to the location, script and recorder in hand and waited for him to arrive. I watched them set up for the auction and show and when he stepped down to walk around a bit and look at the entries, I walked over to him. I introduced myself, told him who I was with and asked him if he knew what *REACT* was. He actually did.

That was the hardest part. I paid him a compliment or two on his music. Even though they are real people, they still live on ego. Remember that.

I then asked him if he would be so kind as to do a few PSAs (Public Service Announcements) for us. He readily agreed and asked if I knew what I wanted him to say.

I produced my recorder and microphone and handed him the script I had written.

He grinned and said, "A man who is prepared! I like that!" Then he said, OK, where can we do this? I found a small closet that was not too bad acoustically and we went to work. He started each PSA with some auction calls and then read the words I had written. In about 15 minutes, we were done. I had made a new friend for both myself and *REACT*, had a cassette tape with 5 PSA's on it and LeRoy's autograph!

Not bad for a day's work.

So, to reiterate... to get a star to do your PSAs, you need three things:

Preparation - have a script ready to use;

Equipment - have a recorder with you that will allow for a quality recording. *Don't rely on doing it on a cellphone*;

And, Chutzpah! You have to have the guts, the cheekiness, the audacity to walk right up and ask the star for his/her help.

Remember, they are people, just like you and me!

I have done that three times, the first time was with LeRoy. The next time was NBC Radio Talknet's Bruce Williams and the last time was Star Trek's Montgomery Scott... James Doohan, when he was appearing at a Star Trek Convention in Omaha.

All of them were more than willing to help. Bruce even took my script back to Florida with him and recorded everything in his professional studio!

Believe me, it's worth the time and effort!

REACT[®] International Inc.,
Special Board Meeting Minutes
June 01, 2020

Chairman Capodanno called the meeting to order at 9:04 PM EST via Zoom teleconference.

Secretary Mahon took roll. (Four (4) Directors for quorum)

Directors

<u>Present</u>	<u>Absent</u>
Region 1 John Mahon	Region 4 Vacant
Region 2 David Perry	Region 7 Vacant
Region 3 Joe Zych	
Region 5 Jeremy Barrett	
Region 6 Tom Jenkins	
Region 8 John Capodanno	
Region 9 Robby Goswami	

Officers

<u>Present</u>	<u>Absent</u>
President John Capodanno	Asst. Secretary Vacant
EVP Tom Jenkins	Asst. Treasurer Matt Misetich
Secretary John Mahon	Treasurer Russ Dunn

GUESTS: None

APPROVAL OF AGENDA: Carrying over of unfinished business.

ANNOUNCEMENTS: There are no announcements.

APPROVAL OF MINUTES FOR:

- a) 03/01/2020 – Minutes: Motion by Region 8, John Capodanno to approve agenda second by Region 2 David Perry. The motion passed unanimously (R1-Y, R2-Y, R3-Y, R4-V, R5-Y, R6-Y, R7-V, R8-Y, R9-Y)
- b) 03/15/2020 – Minutes: Motion by Region 1, John Mahon to approve agenda second by Region 6, Tom Jenkins. The motion passed unanimously. (R1-Y, R2-Y, R3-Y, R4-V, R5-Y, R6-Y, R7-V, R8-Y, R9-Y)

OLD BUSINESS: Dallas County *REACT* Charter

We received the financial statements from Dallas County *REACT*[®]. Region 1, John Mahon reviewed the statement and sent a letter to the Board of Directors. There were a number of accounts conducting transactions with the Dallas County *REACT*[®] general account that were not identified as to a Team account, member accounts or other.

Mr. Jones joined the meeting and explained the entries containing large sums (Account #3381 - \$5,000 in April, 2020; Account #1624 - \$3,194.59 in September, 2018; and Account #4115 - \$10,622.00 in July, 2018)

The financial review noted account entries in general fund for Chase Credit Card, Walmart Visa card purchase, Home Depot, Lawn Equipment, Rollo's Pizza, Café Brazil, Olive Garden and annually at Celebration Restaurant. These may present as red flags by the Internal Revenue Service (IRS) as "*benefit to private and or personal interests.*" Dallas County *REACT*[®] should heed caution to ensuring their book keeping is in order to defend itself. The Board of Directors was not seeking an explanation of these expenditures; that would be the membership's duty. Mr. Jones confirmed that their bookkeeping practices are in order for such a defense.

The matter with the State Texas Lottery Commission (TLC) was successfully resolved by Dallas County *REACT* with the official letter from TLC confirming satisfaction of the original complaint and obligation. Region 9, Robby Goswami requested chronological clarification from Mr. Jones as to actions between the TLC obligation issuance to the resolution to date.

Mr. Jones expressed gratitude for the matter being brought to light as it was best to address and resolve the matter now as opposed to years from now when someone may find documentation of unresolved team obligations.

President Capodanno confirmed that his three (3) directives have been satisfied without further concern. Motion by Region 1, John Mahon to reinstate the Dallas County *REACT* Charter effective immediately, second by Region 9, Robby Goswami. The motion passed unanimously. (R1-Y, R2-Y, R3-Y, R4-V, R5-Y, R6-Y, R7-V, R8-Y, R9-Y)

NEW BUSINESS: None

ADJOURNMENT: at 6:56 PM, PST. (9:56 PM, EST)

- a) Motion by Region 8, John Capodanno to adjourn, second by Region 3, Joe Zych. The motion passed unanimously. (R1-Y, R2-Y, R3-Y, R4-V, R5-Y, R6-Y, R7-V, R8-Y, R9-Y)

The Next Meeting – June 30, 2020 at 6:00 PM, PST (9:000 PM, EST)

NEWS FROM THE **FRONT LINES**

San Angelo REACT

(Texas)

Submitted by King Walker

San Angelo *REACT* was activated to assist the police department for an incident involving a truck hitting a house.

We started at 3 am CDT. There were four of us, two elected officers and two team members. A Dodge pickup had failed to turn at a T intersection and hit a house. The area was evacuated since a natural gas line was cut. Four police units were working the crash which is most of the morning shift.

Scene in San Angelo, TX where a pickup missed a turn and crashed into a house and power pole.

Our support put those officers back into service of the community during the wake up and rush hour time. We were there for four hours as the gas line

was traced, the street tore up and the vehicle removed. A power pole that was also damaged in the crash was stabilized, so that work could be put off until the next Monday morning.

Once the gas was dispersed, the BNSF rail line that had been shut down could then be opened back up for service and the neighborhood could start to go about their day.

We put in 18 man-hours on the incident.

Cleveland County REACT

(North Carolina)

Submitted by Jay Flora

On June 5th, I was on my way to Shelby when I came up on an accident. Using my *REACT* radio, I got on the Cleveland County communications channel and told them what I had. They told me units had been dispatched. I stayed to help out the responding fire department from Lawndale. I provided assistance with traffic. The accident was on Highway 226.

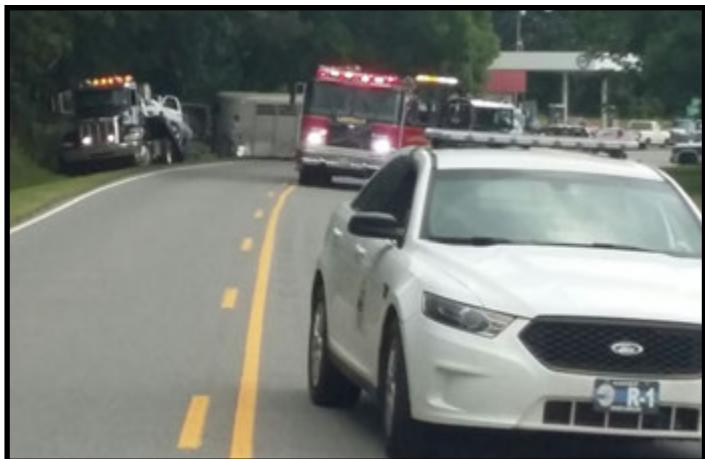

Cleveland County REACT members responded to a call to assist at a scene where a horse trailer was overturned in a crash with an SUV.

A truck pulling a horse trailer and an SUV crashed. The horse trailer turned over and had horses in it. We blocked off Highway 226, turning

all traffic around to go back North to other routes to get to Shelby and Highway 74.

A man and lady in a pick-up pulling an empty horse trailer volunteered to take the horses to the owner's house. I would like to thank them as they gave me Gatoraid and some Water and thanked me for my service out there volunteering. It was quite hot out there and the drinks were very welcome.

Cleveland County REACT (car in foreground) assists at a crash where a horse trailer overturned. This picture shows the trailer back on its wheels.

When it was all cleared up, we opened the highway and called County Dispatch to let them know all was clear.

On June 18th, from approximately 2 p.m. until 3:30 p.m., members of Cleveland County *REACT* assisted the Shelby Police by blocking the west-bound lane of Highway 74 due to a crash involving a semi and two cars in the eastbound lane. All Lanes of the highway were closed and traffic was diverted to Highway 180 to use as a detour to go around the wreck. The semi and one car were on the highway median while the 2nd car ended up in the trees.

Courtesy of the Shelby Star, ©2020*

*Photo by Brittany Randolph
Courtesy of the Shelby Star, ©2020*

The Team used CB Radio Channel-19 to tell drivers on the highway about the closure. Members heard many thanks from motorists and some surprise there was a *REACT* Team in the area. In addition to Cleveland County *REACT*, units from the Shelby Police, Shelby Fire and Rescue, Cleveland County EMS and NC Highway Patrol were present working the scene.

At other times during the month, we helped with other traffic problems in the area and were activated as SkyWarn for a weather watch. Cleveland County *REACT* stays pretty busy!

Trinidad & Tobago *REACT* Council (Trinidad and Tobago)

Submitted by Robby Goswami

Robby Goswami of the Trinidad & Tobago *REACT* Council attended a seminar where *REACT* got some recognition.

RDGL - Training Session 9th - 10th June 2020 at 9:00am - 2:00pm each Day

Never Help! | Leave

Shelters and Shelters Management in the T&T Perspective

REACT

- Establish a line of communication between the Shelter and the EOC.
- REACT members are valuable assets post disaster.
- They usually have a wealth of information to pass on to shelterees about the status of the disaster and the response efforts.

Trinidad & Tobago Red Cross Society

International Federation of Red Cross and Red Crescent Societies

The Shelter Management Training program was hosted and presented by the Red Cross and MORDLG, recognizing *REACT*'s role.

County Caroni *REACT*

(Trinidad & Tobago)

Submitted by Rohan Rampersad

REACT County Caroni 6005 participated in a simulated exercise on Wednesday 17th June, 2020 staged by the Disaster Management Unit of the Chaguanas Borough Corporation. “Exercise Covid-19” was conducted to test the readiness of all stakeholders in the event of shelter activation. The exercise commenced at 0930 Hrs and was concluded at 1035 Hrs.

The Exercise Brief

“Due to adverse weather conditions being experienced within the Borough and with the Meteorological Services last issued bulletin at 0800Hrs the weather alert has since been upgraded to Red Level Alert. Several persons in the Old Longdenville area are requesting evacuation while others are requesting temporary shelter. These request were received via CBC Hotline as well as the Councillor for the area.”

Four (4) radio operators of the Team participated in the exercise. R501, Rohan Rampersad and R511, Annette Rampersad functioned as Net Controllers operators while R510, Brian Traboulay and R507, David Alexander were deployed to the Chaguanas Indoor Sporting Facility (staging area). There were other members who monitored from their homes and were standing by to assist in relaying messages should the need arise.

REACT provided radio

communications in support of scenarios/ injects from the exercise planners. Messages were relayed to the EOC utilizing the DMUs trunked radio system with *REACT* County Caroni 6005 VHF radio system as back-up

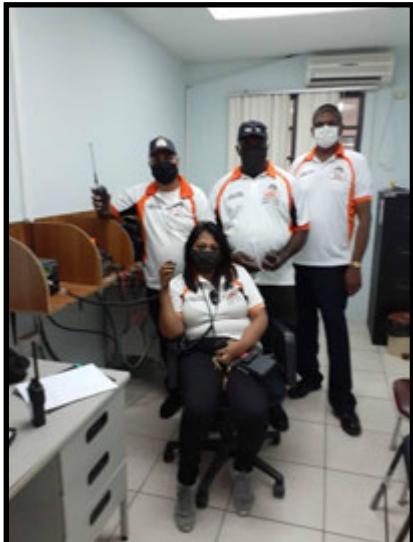

REACT County Caroni 6005 is pleased to have been a key player in the exercise and continues its selfless service to the community and related agencies

Oklahoma County *REACT*

(Oklahoma)

Submitted by Dale Ellis

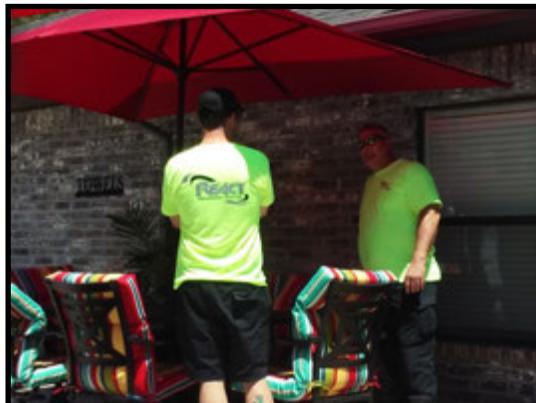

Recently members of Oklahoma County Emergency *REACT* #2620 got together after the several month coronavirus lockdown was lifted. Members and their families got together to hold a business meeting and pool party/picnic.

Team member and host of the party, John Goodman and his wife cooking for the event.

Team and family members enjoying a nice day at the pool.

Team members Lee Chambers (left) and Ed Hagstrom (right) discuss world events and other stuff.

INCLEMENT WEATHER – *REACT* RESPONDS

Submitted by: Ravindranath “Robby” Goswami, 9Z4RG/AK4NB, Region 9 Director

On Saturday June 27, 2020, the passage of a tropical wave resulted in inclement weather that affected Trinidad and Tobago. Heavy rainfall and gusty winds resulted in fallen trees and blown-off roofs, especially during the early morning period.

REACT members were quickly engaged in passing traffic on the various communications channels, including the VHF radio systems and Zello, which were kept very active. Information on affected communities was relayed to the Disaster Management Units (DMUs) of the municipal corporations, the Ministry of Rural Development and Local Government (MoRDLG) as well as the main coordinating body, the Office of Disaster Preparedness and Management (ODPM) all of which *REACT* has had a long-standing and close working relationship.

Given the scale of the damage reports, *REACT* members, many of whom are CERT trained also stepped in to give assistance to affected residents. One such effort that was coordinated via the *REACT* radio system was the case of a large tree that fell on the D’Abadie home of an 80-year-old female. When the report was sent in, a CERT team arrived. *REACT* also assisted with a chain saw in order to clear the main trunk of the tree.

Larry Joefield – *REACT* Unit 853 was first on-scene and conducted the Initial Damage Assessment (IDA). He made the request for assistance via the VHF radio system and continued to provide and receive updates for several hours. Also responding to this incident were Faizul Mohammed – *REACT* Unit 708, Pooran Ramdass – *REACT* Unit 709 and Roshan Manickchand – *REACT* Unit 711. Together they assisted in ensuring that the tree was cleared. Anwar Mondol – *REACT* Unit 701 who is the liaison with the DMU, coordinated the efforts to ensure the response was timely and conducted safely.

Several *REACTers* from all of the Teams responded in various areas throughout the country providing yeoman service in the time of need. We are very grateful for their response and for going beyond the call of duty. Congratulations to all.

A Guide to Personal Radio Services

With all the new members out there, The REACTer feels that a refresher article on which Personal Radio Services are available for REACT use, which services require a license and which do not and what each service does is in order. The following article is from FCC.gov, not from REACT International.

Personal radio services are short-range, low-power radio communications using devices that operate much like walkie-talkies. Personal radio services include one- and two-way voice services, data services and remote-control transmissions that operate equipment.

Personal radio services devices generally do not rely on transmission towers or other equipment. Some types, especially those using VHF and UHF radio spectrum, encounter significantly less static, noise and fading than CBs or walkie-talkies.

The most popular types of personal radio services are Citizens Band Radio Service, Family Radio Service, General Mobile Radio Service, Low-Power Radio Service and Multi-Use Radio Service. Of these types of services, only General Mobile Radio Service requires an FCC license to operate.

Citizens Band Radio Service (CB)

CB service allows two-way radio communications.

CB service operates on 40 shared channels on a "take-turns" basis, meaning no CB channel is assigned to any specific individual or organization. Users must never talk with another station for more than 5 minutes continuously, and must wait at least one minute before starting another communication on the same channel.

CB equipment used in the United States must be FCC-certified and labeled as such by the manufacturer.

You may not raise the power output of your CB unit, attach any type of power amplifier or modify the unit internally. The maximum authorized power levels vary depending on whether the station is transmitting a single side band (up to twelve watts Peak Envelope Power or PEP) or an AM signal (up to four watts PEP).

Family Radio Service (FRS)

FRS allows two-way voice communications over short distances (generally less than one-half mile on the 0.5 watt channels and up to two miles on the 2 watt channels, depending on conditions).

An FRS unit looks and works much like a walkie-talkie.

There are older, dual-use, FRS-General Mobile Radio Service (GMRS) units, but you may legally use only the FRS channels unless you have a GMRS license. The label on the unit or the operations manual should indicate the service the unit is certified for. FRS-only units transmit at lower power levels and have antennas that are integrated with the unit; GMRS units transmit at

GMRS is a land-mobile radio service available for short-distance, two-way communications.

A GMRS system may legally be operated only with an FCC license.

higher power levels and may have detachable antennas. Note that dual use FRS-GMRS radios may no longer be sold.

You can operate your FRS unit anywhere in the U.S. and its possessions.

General Mobile Radio Service (GMRS)

GMRS is a land-mobile radio service available for short-distance, two-way communications.

A GMRS system may legally be operated only with an FCC license. The individual licensee is responsible for the proper operation of the GMRS system. A licensee may permit his or her immediate family members to operate the GMRS system.

A GMRS system is made up of station operators and a mobile station consisting of one or more mobile units. It may also include one or more land stations. Some land stations operate as repeaters, thereby extending the range of GMRS mobile units.

New GMRS licenses are granted only to individuals, but GMRS licenses granted to non-individuals (such as businesses) before July 31, 1987, can be renewed if certain conditions are met. You can apply for a GMRS license online, or by filing FCC Form 605. The FCC sets license filing fees annually, and licenses are granted for 10 years.

Low Power Radio Service (LPRS)

LPRS is a private, one-way short-distance communication service that allows stations to transmit voice data or signals for auditory assistance to people with disabilities, people who require language translation, and certain individuals in educational settings. LPRS also allows stations to transmit voice, data, or tracking signals for health care-related communications and certain law enforcement activities. Two-way communications are prohibited. LPRS can also be used for network control communications in the Automated Marine Telecommunications System (AMTS).

LPRS transmitters can be operated anywhere in the United States.

Multi-Use Radio Service (MURS)

MURS is a private, two-way short-distance voice or data radio communications service.

The service operates on five VHF channels. MURS users must cooperate in using the five channels to reduce interference to other users. No user has priority over any other user, but all users must yield to emergency communications. A MURS station may not operate as a repeater station, including store-and-forward packet radio operation, or a signal booster.

Maximum allowable output power for a MURS unit is two watts. Transmission range between two hand-held units varies depending on the unit's antenna height, terrain and weather.

Unlicensed radio operation

Be aware that if you operate a radio transmitter that requires a license, or use a radio that is authorized for only a specific service for an unauthorized service, you may be fined or imprisoned, and/or the equipment may be confiscated.

REACT: Resource Typing & Certification Program

NIMS and ICS

During 2011 and 2012, the Board of Directors of *REACT* International, Inc. sought to strengthen our organization's commitment to the concepts and principles set forth in the National Incident Command System (NIMS, Presidential Directive HSPD- 5). *REACT* recognizes and acknowledges the importance of the National Incident Management System (NIMS) and the Incident Command System (ICS) in the performance of missions at the team level. Federal mandates and rollout schedules have affected funding to law enforcement, fire and EMS organizations.

While not directly affected, many teams serve local agencies that fall under these Federal NIMS requirements. Teams have in the past been encouraged by the Board of Directors to take FEMA NIMS training online. Your current membership card now contains a checklist of these classes and whether you have received credit for taking them. *REACT* is now raising the bar for team performance and NIMS compliance. By standardizing *REACT* resources, we are preparing for improved national, regional and local response/deployment. By tying our resource typing levels to a program of certification, we are encouraging teams to increase membership and capabilities. We hope your team will be up to accepting these challenges.

Resource Typing

If you are unfamiliar with resource typing, we'll do a brief explanation. In a nutshell this is what resource typing is. Take a piece of fire equipment or apparatus such as a pumper truck. You can have a basic pumper capable of pumping 500 gallons per minute with 1 inch hoses or a super duper pumper with 1, 2 and 4 inch hoses and a 1500 gallon per minute pump. NIMS resource typing has created four degrees or standard levels for each typed resource and created a national standard for approximately 120 typed resources. There is a Type IV, Type III, Type II and Type I pumper truck. Type IV is the most basic. Each higher type has more and more capability. Type I is the most capable. Incident Commanders can then look up and order these standard resources for incidents and everyone knows exactly what they are asking for and what they are going to get. Resource typing can apply to equipment or people or both.

We have chosen to start with the most common activities that *REACT* teams engage in. We have created a set of standards that are measurable and consistent. There should not be a team that cannot function at a Type IV or Type III level for their most frequent activities. As you strive to achieve certification, your team will be challenged to grow through increased membership and capabilities. This program will bring new encouragement for team drills and individual training in order to become certified as Type II or Type I resources.

Benefits of participating in the program

Becoming a certified, typed team is totally voluntary. Teams are not required to participate by reaching for and achieving the standard types. However, look at the benefits. *REACT* International, Inc. has published this Resource Guide for entities at every level to see. We want everyone from FEMA down to your local served organizations to have access to this *REACT* Resource Guide for information about your team and it's capabilities. When they need these kinds of standard resources they may refer to these documents to request your team's assistance with an event. What would be better than to able to report that you are a *REACT* certified Type II Parking Control team. The resource typing chart will contain everything officials and served agencies need to know about your team capabilities.

Because our *REACT* Resource Typing Project follows the NIMS format for resource typing, it is consistent with Federal Tier 1 and Regional Tier II typed resources. We do not know if or when our *REACT* resource types may be regionally or nationally accepted. Wouldn't you want your team to part of it when that happens?

Common and consistent training and equipment

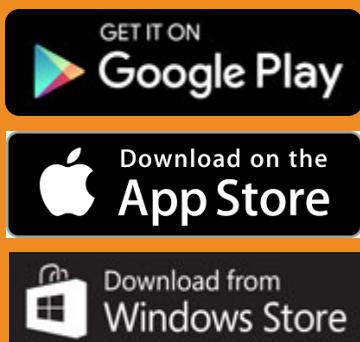

All typed resources are consistent in regards to training of personnel and equipment required to achieve each resource type level. This ensures that when a Type III Communications Team shows up, they will have all the equipment and people available according this *REACT* Resource Guide.

REACT International: 301-316-2900 (Inter-Office Phone: Ext 114)

email: editor@thereacter.com

Items on the calendar are as accurate as we can make them but are subject to change.

Any questions ... contact the person in charge of the event

Most National/International Holidays are now in the calendar. They are in CAPITAL PRINT

We're America's Hobby Radio Magazine

There is only ONE regularly published magazine that covers CB radio, scanners, two-way radio, GMRS, FRS and MURS!

Check out NATIONAL COMMUNICATIONS MAGAZINE!

NATIONAL COMMUNICATIONS

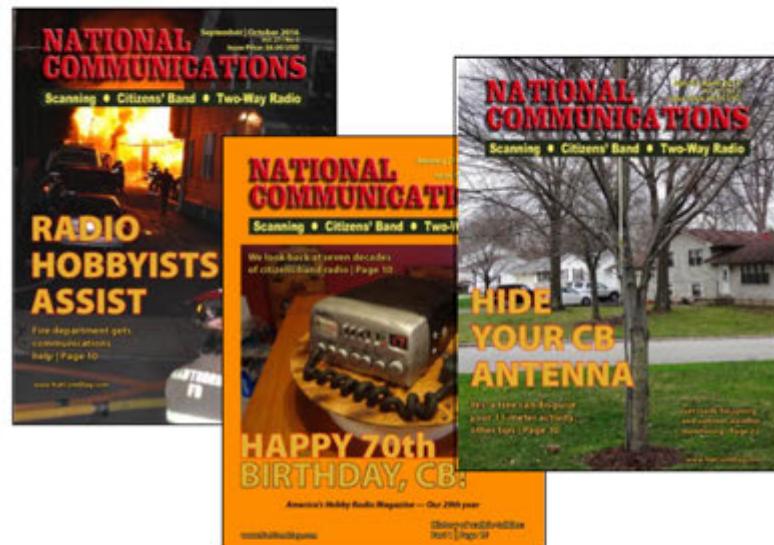

Scanning • Citizens' Band • Two-Way Radio

NatCom publishes six times a year and persons with an online access account get access to not only the current issue of the magazine in PDF format, but also every issue of the magazine published going back to 1988! That's 29 years of pure radio communications reading!

NatCom covers listening to the scanning bands so you get the most out of your scanner, how to get more out of your CB equipment and how to use the MURS, GMRS and FRS bands. No other magazine covers ALL these hobby radio topics!

NatCom is only available online and online access account holders are given access to the current issue as well as every issue back to 1988. We're **America's Hobby Radio Magazine**, the oldest continually published communications magazine!

Join the NatCom family today and order your online access account. One year of online access costs **only \$25**, while we are offering for a limited time two-year online access accounts for \$48 (a \$2 savings) and three-year online access accounts for \$70 (a \$5 savings).

To order your own online access account, go to www.NatComMag.com and click on "Click here to subscribe online." There also is a link for a **FREE ISSUE DOWNLOAD** to check us out!
